

DRC'S COMPLETE ASSESSMENT SOLUTION

A COMPREHENSIVE PACKAGE TO MEET THE
NEEDS OF YOUR TESTING PROGRAM

DRC's total solution package offers our summative, placement, interim, and cognitive abilities assessments on one universal online platform—DRC INSIGHT. The assessments may be purchased individually or in any combination to tailor to your program needs.

TerraNova NEXT

**Standardized, Norm-Referenced
Achievement Test**

InView

Cognitive Abilities Aptitude Test

DRC BEACON

Formative/Interim Test

TERRANOVA NEXT

TerraNova NEXT, our newest member of the TerraNova assessment family, is based on the same technically sound, reliable, and valid qualities that you have come to expect from TerraNova3. TerraNova NEXT assesses reading, language, math, science, and social studies, and uses the same scale of measurement, proficiency-level classifications, and national norms as TerraNova3. It provides a comprehensive set of objective performance and associated mastery-level information aligned to National Standards and the College and Career Ready standards.

TerraNova NEXT can be administered at any time throughout the school year. TerraNova norms have been built to provide national comparison feedback that adjusts for the week of instruction in the school calendar year that you administer the test. This provides schools with maximum flexibility to test for multiple purposes and as desired (competitive entry screening, school placement, gifted identification, fall diagnostic, and/or as a summative assessment).

TerraNova NEXT is commonly used for:

- Summative Testing
- Placement Testing
- Screening
- Gifted Identification

TerraNova NEXT provides:

- Mastery of Objectives
- OPI Skill Indicators
- Proficiency Levels
- National and Local Norms
- Longitudinal Growth Scale

“Using our TerraNova data, our schools have gone beyond looking at test scores as rankings and have focused more on growth, mastery, and challenging students to reach their potential.”

- Sister Edward William Quinn, IHM Assistant
Superintendent for Curriculum, Instruction and Assessment
Archdiocese of Philadelphia Schools

INVIEW COGNITIVE ABILITIES ASSESSMENT

An innovative cognitive abilities assessment, InView reliably measures skills and abilities important for academic success. Unlike traditional IQ tests, cognitive abilities can grow and change over time with student brain development. A cognitive abilities assessment helps define and focus on individual student learning needs more effectively. InView results help plan effective programs for students, diagnose possible learning disabilities, and screen students for gifted identification.

Schools receive norm-referenced scores by grade and age as well as the Cognitive Skills Index (CSI) score. When used with TerraNova, InView provides Anticipated Achievement scores—i.e., actual and expected scores for individual students and groups.

InView is commonly used for:

- Cognitive Abilities Testing
- Universal Screening
- Combination Testing
- Identifying gifted and/or potential learning disability

InView provides:

- Grade and Age Norms
- Anticipated Achievement
- Cognitive Skills Index (CSI)
- Verbal and Non-Verbal Scores

“We hear at the district time and time again, both from school-level leaders as well as classroom teachers, how valuable BEACON has been for them in terms of the data that it provides, the immediate feedback that they have to support student learning, and the ability to change something as it’s occurring if they need to, to meet the needs of students.”

-Lyn Turnell, Ed.D.
Director, Student Assessment Dept.
Cherokee County Schools

DRC BEACON

DRC BEACON is an interim assessment that helps educators identify where students are today and what they need to learn tomorrow, giving clarity on how to target instruction and make informed decisions. It measures progress, provides projected growth towards end-of-year targets, and predicts performance on

TerraNova NEXT. The computer-adaptive design provides students with tailored questions that adjust to their learning level.

DRC BEACON pinpoints skill areas requiring additional attention and provides resources to help personalize student instruction. Each BEACON Educator Instructional Strategy (BEIS) provides extensive information related to the standards, along with instructional supports and lesson plans, clarifications, enrichment, and professional development.

DRC BEACON is commonly used for:

- Interim/Formative Testing
- Instructional Planning

DRC BEACON provides:

- Growth Tracking
- Learning Progressions
- Instructional Strategies
- Grade-Level Readiness
- Student Goal Setting
- Prediction to TerraNova
